COR - Staff Minutes 14 Oct 1958

RMB reported on his recent discussions with BMD and ARPA in the 117L/CORONA program. Said differences in opinion between AF and ARPA made a difficult program even more complicated. He hoped the substantive considerations of the program would not be obscured by antagonisms that have become evident. Appeared then that bio-med shots under COR might be dropped and the 6-inch pioneer version of 117L might be eliminated.

SECURITY ~~XX~~ at Vandenberg

Roy W. Johnson in Oct 1958 declared that VAFB launch site was to be a classified area with no visitors allowed. This would give the lie to COR's cover story of an unclassified purpose for COR shots.
